PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

A 60-acre military installation is located in the southeast section of Chernovtsy (Figure 1). The military barracks area is within the city, across the street from the most southern section of the city park. The installation is road served and has access to the Chernovtsy-Kolomyya railroad.

This installation (Figures 2 and 3) is partially fenced, and can house approximately 2,000 troops. Contained within the installation are six probable multistory barracks; two probable multistory administrative buildings; seven probable support buildings; three prob-

able storage buildings, of which one is within a fenced area; and one probable drill field. Outside of the fenced area are 10 probable multistory dependents quarters and one multi-story administrative building.

The nearest training and maneuver area is approximately 28 kilometers (km) southwest of the installation, near Storozhinets.

The installation is covered by TALENT photography of 1956. KEYHOLE missions between September 1961 and February 1964 reveal no significant changes within the installation.

DESCRIPTION OF INSTALLATION

Railroad Service

The city of Chernovtsy is served by the northwest-southeast Chernovtsy-Kolomyya railroad and contains a classification yard. No repair facilities were observed.

Road Service

There are several hard-surface roads in and around the city of Chernovtsy.

Aircraft Landing Strips

Two km southeast of the city is a sod/dirt field with a landing area 6,200 by 2,900 feet. Chernovtsy Northwest Airfield is 16 km north-

west of the city and has a 6,600- by 200-foot concrete runway.

Administrative and Troop Housing Areas

Area D1 contains six probable multistory barracks with a capacity of approximately 2,000 troops; two probable multistory administrative buildings; seven probable support buildings; three probable storage buildings, one within a fenced area; and a probable drill field.

Area D2 contains 10 probable multistory dependents quarters and a multistory administration building.
